

what next is washington doing to us , it is unfare to the truckers and others that pay for the service of this it helps them with re-routing there ways to delivery goods and for pickup of goods. now what good would that be for them to want that now every one knows it is a money game . NOT FARE and it is so sad that they want and want to hurt them that need this kind of help for the safty for all. and to know what the weather is like in the winter time, as being a retired Navy family being and trying to keep our heads above water as most vet's out there that drive over the road big trucks . they need this and we pay for what we want to be safe just like the weather stations on the CB radios for safty. any thing for safty. i hope you all think of safty of them who get your good to you through all kinds of weather and for the last few weeks it has been really bad out there for truckers and all in the areas that have had twisters and high winds to get away from the storms of even shut down for there safty. My husband works very hard for what 3we have and it is time for those to find out we say no to stopping the sat Radios in trucks and cars . get a life to them i say . Mrs Louise Raymond A very Proud retired Navy wife God bless America lets keep it FREE!
